

WildLifeKeeper (WLK) Whitepaper

Introduction

WildLifeKeeper (WLK) is a purpose-driven meme project designed to fund and support startups within our Startup Venture Studio. WLK is the core token of this initiative, facilitating investment and growth. As our selected startup projects grow and generate revenue, a portion of the profits will be reinvested into WLK, ensuring its continuous development and sustainability.

Our mission is to enable WLK holders to benefit from the success and expansion of WildLifeKeeper.

Initial Startup Projects

As a starting point, three startup projects have already been identified:

- One focuses on casual gaming.**
- The other two are developing technologies to streamline international trade and collaborations.**

Since the patents for these technologies have not yet been secured, detailed information about these projects will remain confidential for now. We will disclose further details as soon as the patents are secured.

Telegram Project Roadmap

Our Telegram-based initiative aims to reach its peak within 60 days:

- **First 30 days:** Onboarding new users.**
- **Next 30 days:** Preparation for token listing.**

During this period, the entire token supply will be distributed. However, this is only the beginning—Season 2 is on the horizon.

What Happens in Season 2?

Season 2 will introduce a completely new and groundbreaking approach for WLK holders, bringing even greater opportunities and rewards. However, the details of this phase must remain undisclosed for now. This decision is necessary to protect our innovative ideas from being copied or implemented prematurely by competitors before we fully realize our vision. Rest assured, what awaits in Season 2 is something far beyond conventional rewards like USDT or NFTs—it will redefine the way value is distributed within our ecosystem. Stay tuned, as all will be revealed in due time.

Why the Secrecy?

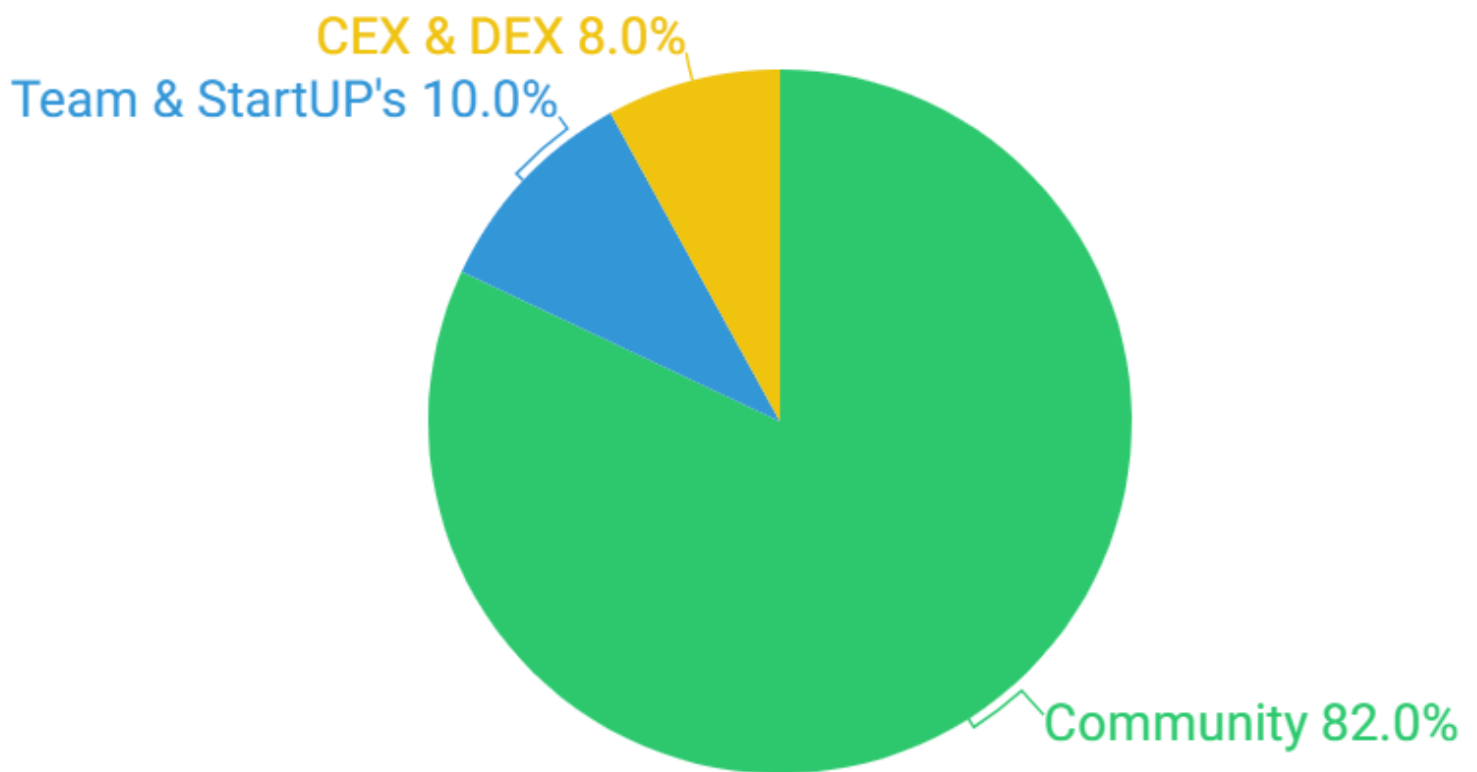

To prevent premature replication by industry players, we are keeping certain details undisclosed until the appropriate time. Our goal is to ensure that WildLifeKeeper maintains a competitive edge while building an ecosystem where innovation thrives. Just as we respect the revolutionary impact of DOGS on Telegram, we expect our Season 2 achievements to be acknowledged and respected as well.

Why Ton Blockchain?

- **Ease of Use & Simplicity:** User-friendly and accessible to everyone.
- **Speed & Integration:** Seamless and efficient operations.
- **Low Transaction Fees:** Affordable transfers and purchases.

Tokenomics

- 👤 **82% allocated to the community** (No lock-up period)
- 🏢 **10% reserved for the team and future development**
- 💰 **8% allocated for CEX & DEX liquidity and listing-related activities**

Total Supply: 549 billion \$WLK

Legal Disclaimer

This document is for informational purposes only and does not constitute financial advice, recommendations, or an offer to purchase or trade WLK tokens. The information presented herein does not serve as the basis for investment decisions. Participants should fully understand the risks associated with WLK. By engaging in this project, investors acknowledge, understand, and accept these risks.

Regulatory frameworks regarding blockchain fundraising and digital tokens vary across jurisdictions. Legal or policy changes could lead to financial losses for participants. Investors making independent decisions must fully accept and prepare for such risks, which include but are not limited to regulatory uncertainty, compliance challenges, economic fluctuations, cybersecurity threats, management risks, and industry-related volatility.

WLK is a fungible utility token within the WildLifeKeeper Startup Venture Studio ecosystem, operating on the TON Blockchain. It is not a security, stock, bond, or any other financial derivative. All WLK holders must comply with local laws and regulations and assume full responsibility for any associated risks.

Nothing in this whitepaper constitutes a guarantee or promise regarding the development, utility, or value of WLK tokens. The plans outlined herein are subject to change and are influenced by factors beyond WildLifeKeeper's control, including market conditions and broader cryptocurrency industry trends.
